Weekly Report

Week 3: 2026/06/15 - 2026/06/21

The Subject of This Week:

1. Provider Exclusion List Project
 - a. The objective of this project is to create a database that contains all of the excluded providers.
 - b. The ten states that I'm responsible for include Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine
 - c. Tools/applications that we will use: PostgreSQL, pgAdmin 4, Python, Django, DBdiagram, Excel

Weekly status / progress:

1. Continued cleaning the data with Python, for each of the state respectively and LEIE database
2. Added the PostgreSQL staging table for the LEIE national database in pgAdmin4
3. Found the data for Maine state so add the PostgreSQL staging table of it in pgAdmin 4 and also clean the data with python
4. Uploaded the cleaned data file of each state and LEIE into their respective PostgreSQL staging tables in pgAdmin 4
5. Checked the columns of each table, ensuring that they include all columns from the databases and are consistent with those in original data
6. Modified the staging tables to add "NOT NULL" for every column so that our tables don't have "NULL" values
7. Modified the staging tables to remove word limitations

Github: <https://github.com/le-luo327>

Plan for next week:

1. Combine & merge the staging tables into a large main table
2. Use Django in Python to build the searching webpage for the database
3. Further revise & manage the database according to needs

Hours Worked: 15h
